

2025 Bath Collection

Jacuzzi®

The transformative power
of not doing

Now more than ever,
we need to
take care of ourselves and
NOT DO anything from
time to time.
It transforms
how we feel and
how we feel about
our world.
Not doing
never felt so good.

Our story originated when Ken Jacuzzi, age 2, was diagnosed with rheumatoid arthritis. His father invented the world's first at-home pump to provide pain-relieving hydrotherapy.

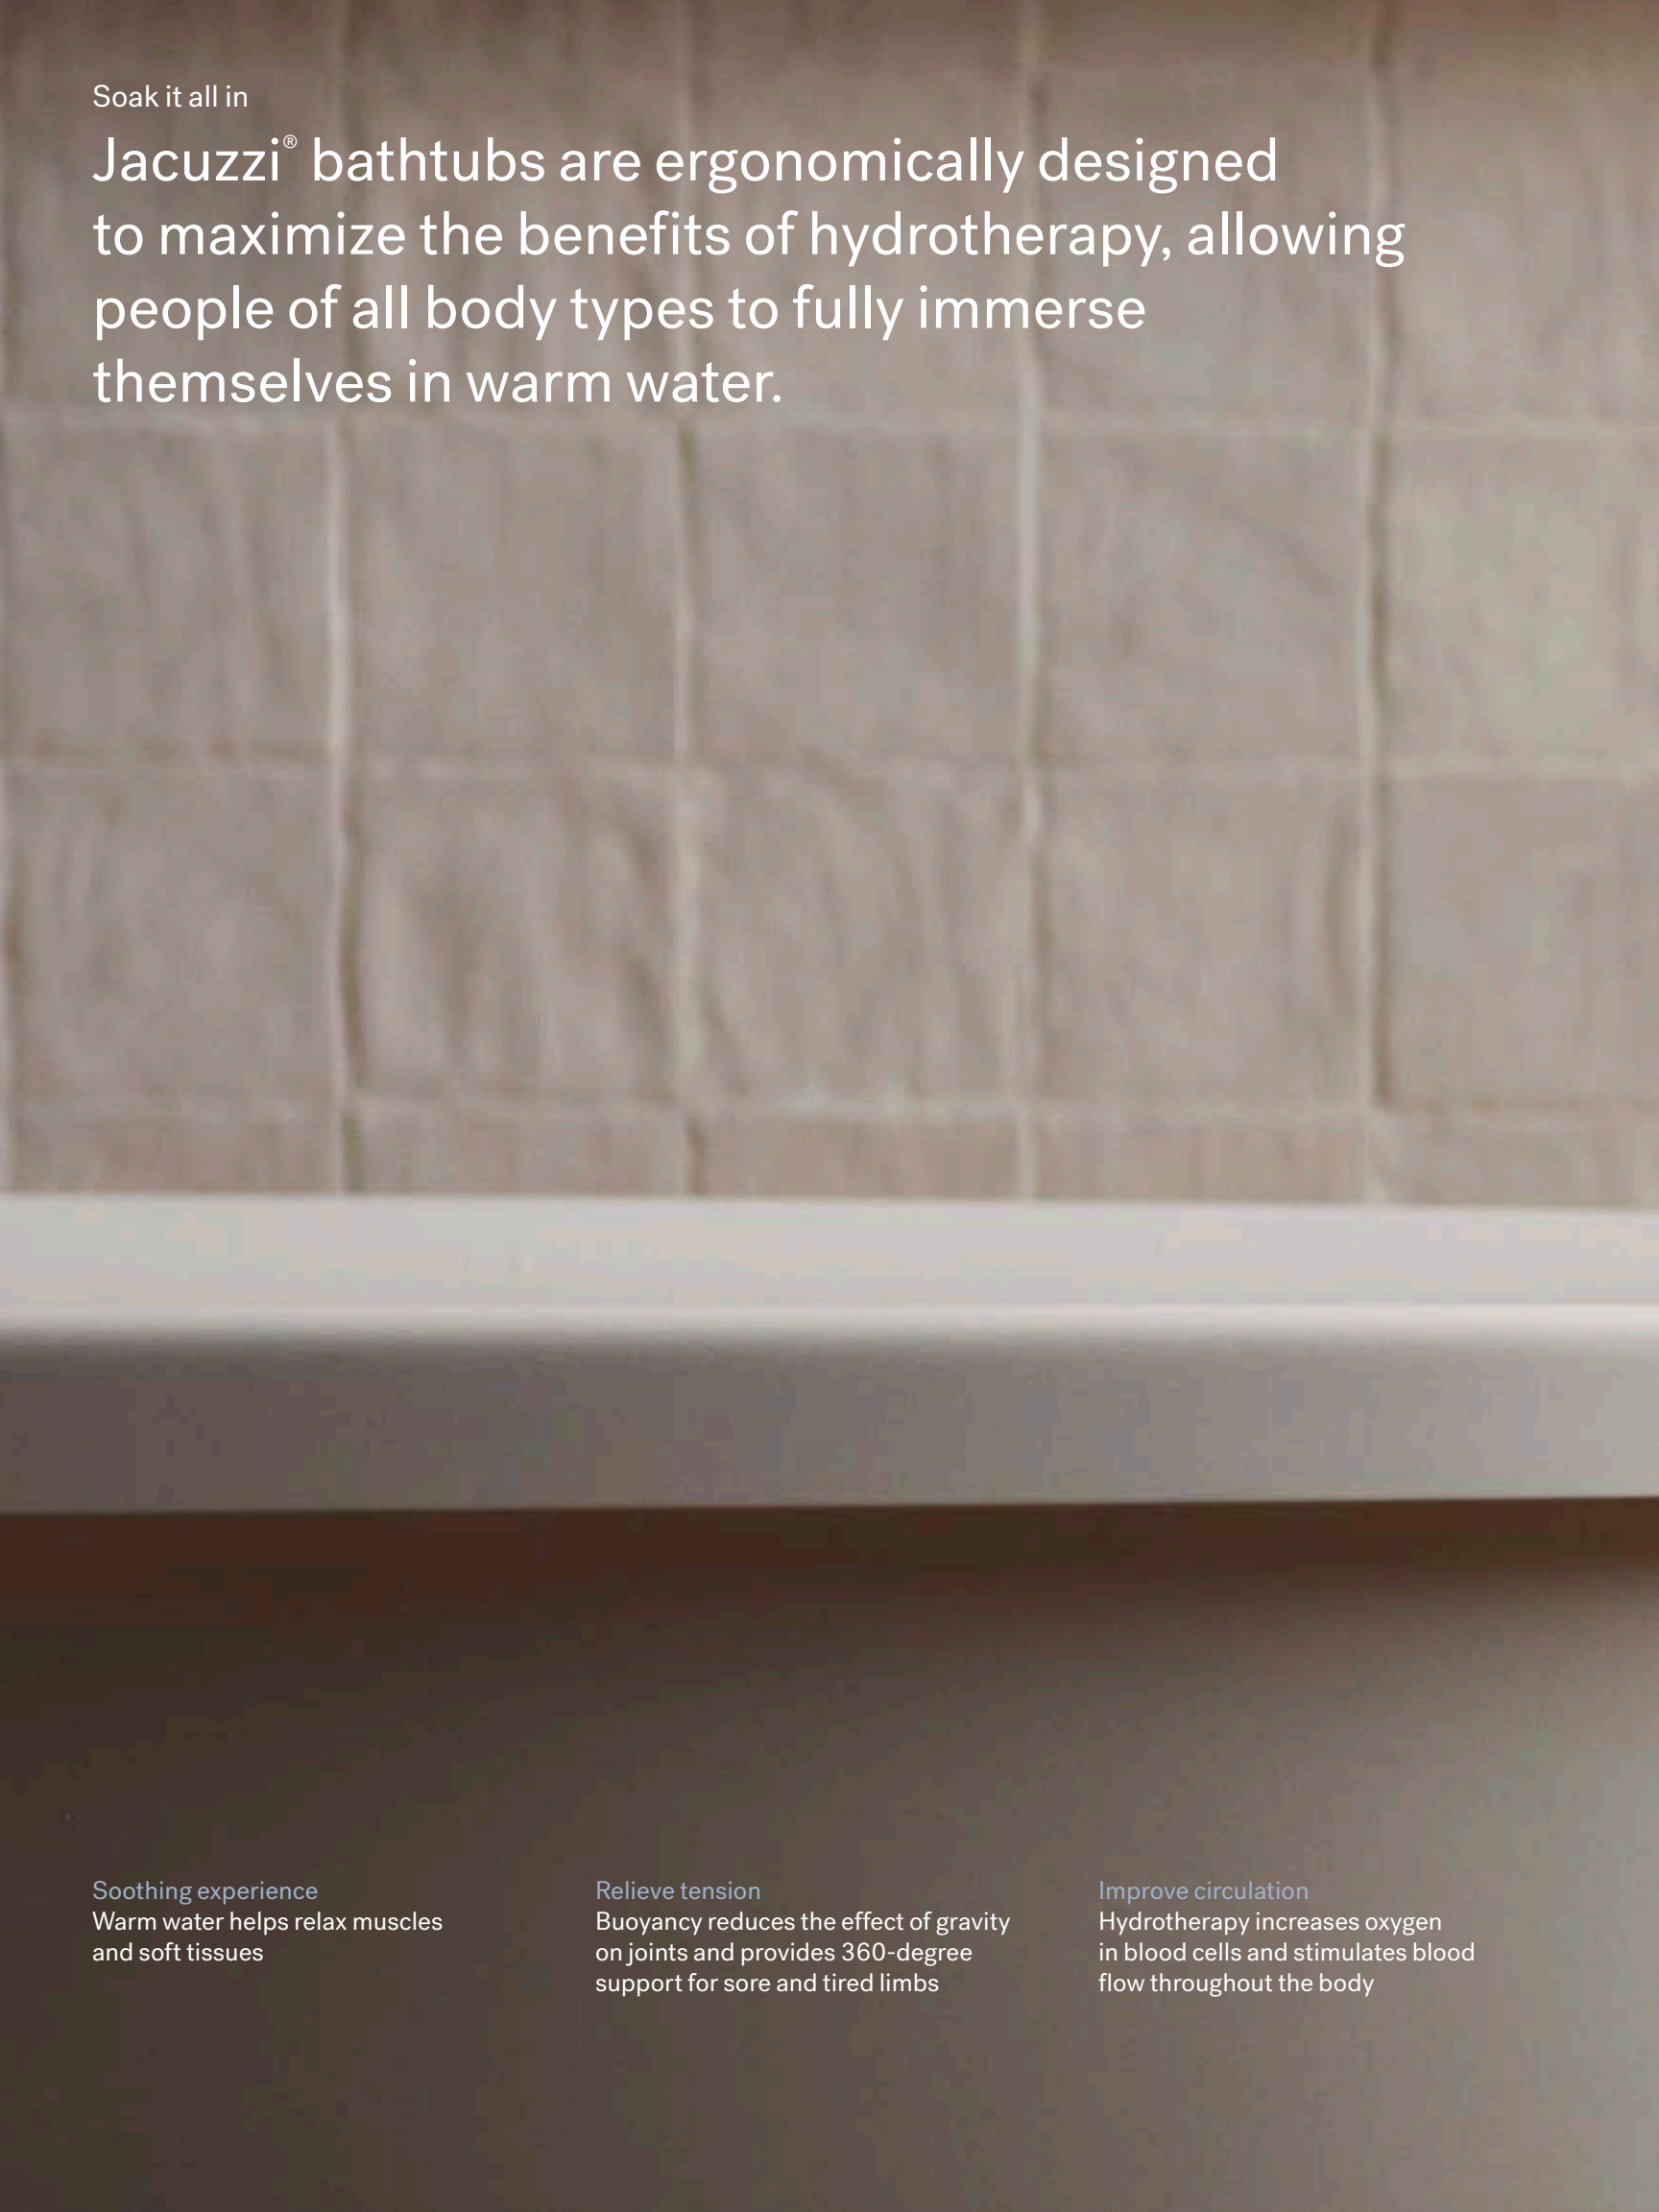

From that moment forward, Jacuzzi has deepened its expertise in moving water, bringing joy to millions of homes around the world.

Jacuzzi brand products are designed to restore balance and heighten the joys and benefits of hydrotherapy. Our products are enjoyed in more than 100 countries and are manufactured by thousands of employees in five countries.

The most extraordinary pause in the world.®

Soak it all in

Jacuzzi® bathtubs are ergonomically designed to maximize the benefits of hydrotherapy, allowing people of all body types to fully immerse themselves in warm water.

Soothing experience

Warm water helps relax muscles and soft tissues

Relieve tension

Buoyancy reduces the effect of gravity on joints and provides 360-degree support for sore and tired limbs

Improve circulation

Hydrotherapy increases oxygen in blood cells and stimulates blood flow throughout the body

Behind this extraordinary pause is the Jacuzzi® hydromassage, a distinctive and unrivaled experience. Heat, buoyancy, and optimal massage all come together for your relaxation, joy, and well-being.

Whole body relief and recovery

Gentle pressure on muscle tissue increases circulation. This stimulates blood flow, which can help soothe tired muscles and joints.

Relieves tension and promotes back relaxation

Energizes circulation after sitting for long periods

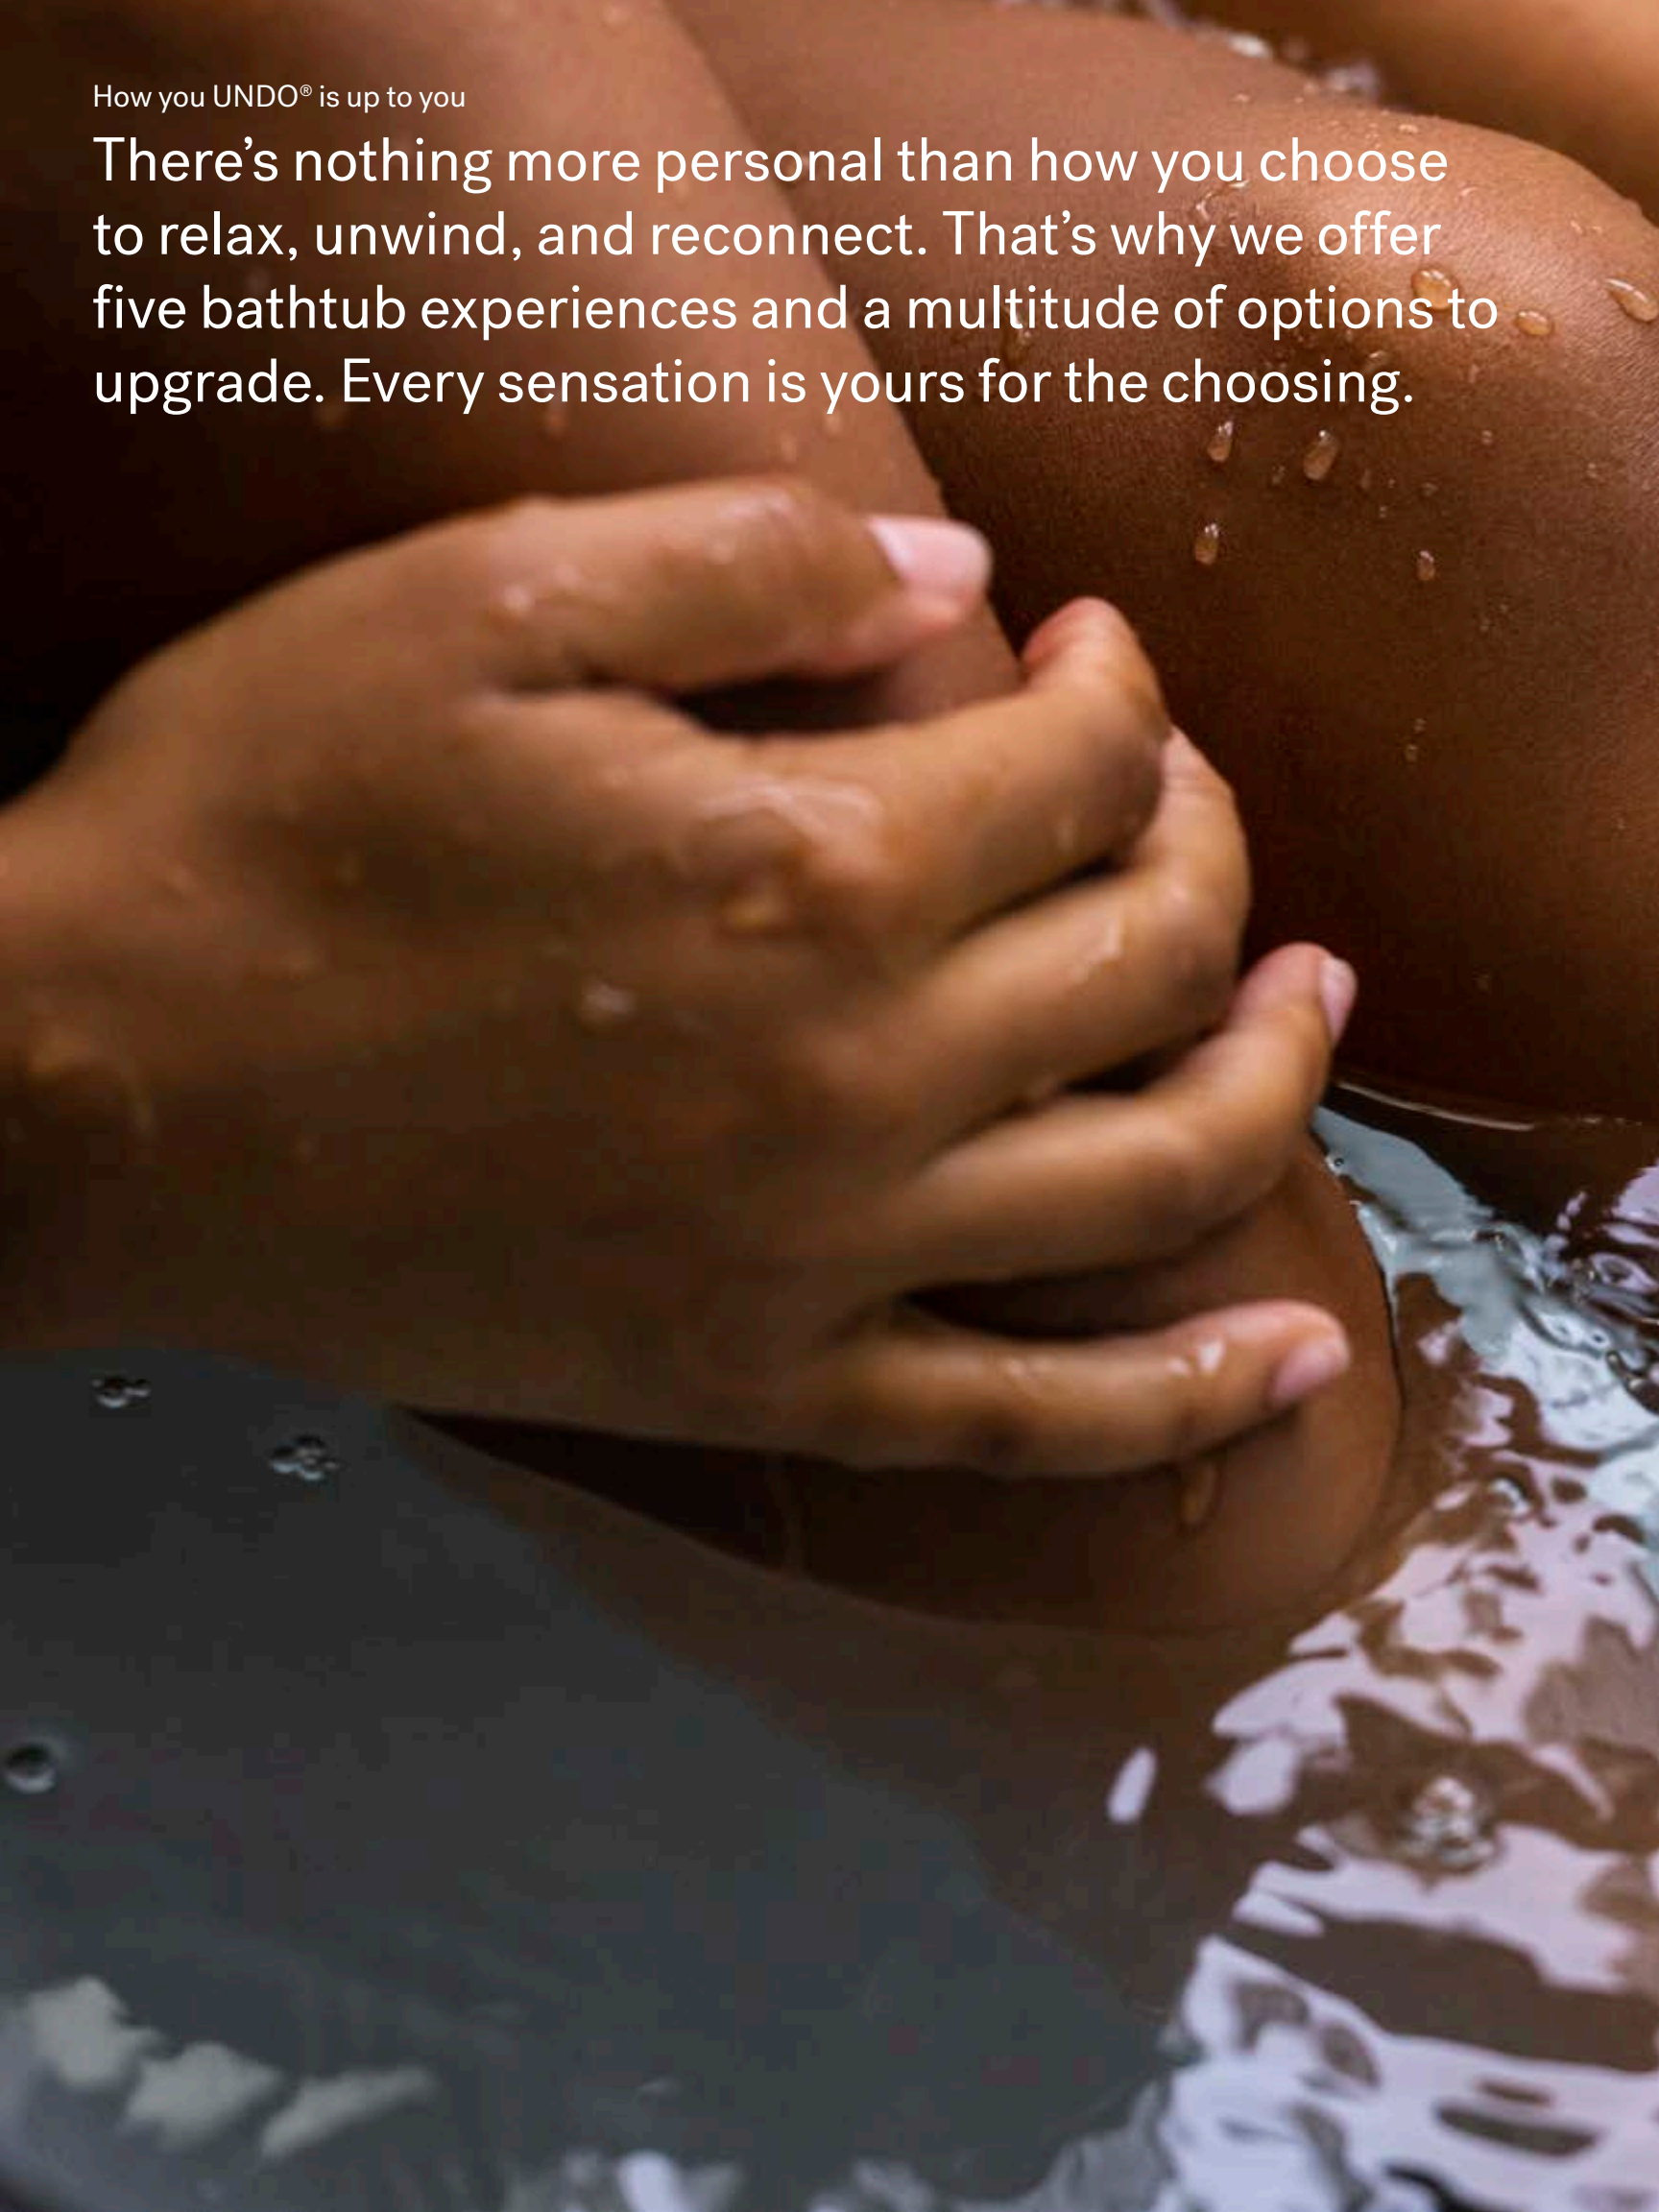

Promotes flexibility in hard-working calf muscles

Sends massaging warmth to joints and sore feet

How you UNDO® is up to you

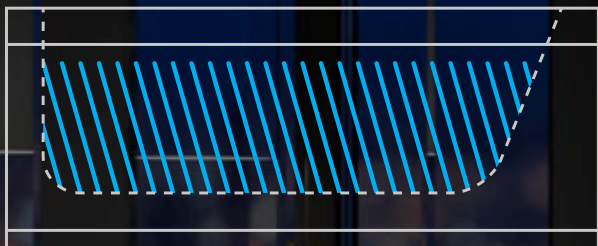

There's nothing more personal than how you choose to relax, unwind, and reconnect. That's why we offer five bathtub experiences and a multitude of options to upgrade. Every sensation is yours for the choosing.

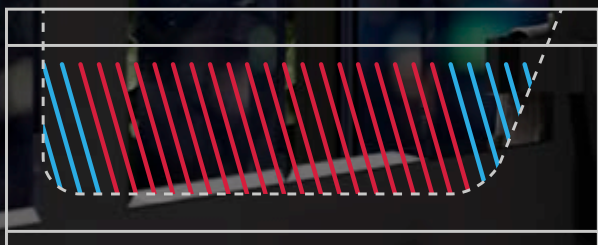

Soak/Heated Soak

Indulge in the fundamental form of hydrotherapy (Soak)
by circulating heated water continuously (Heated Soak).

S

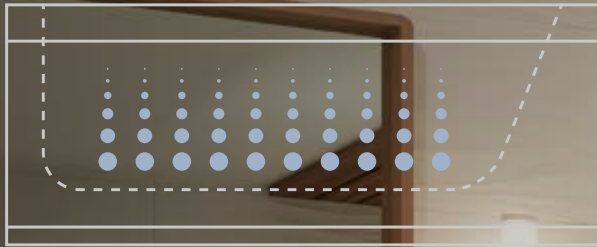

HS

SOAK

Pure Air® Bath

Small air jets release heated bubbles that rise through the water, creating a gentle, revitalizing massage.

PA

PURE A

®

Whirlpool

Jacuzzi® jet systems push high volumes of water mixed with air for an invigorating hydromassage bath.

WP

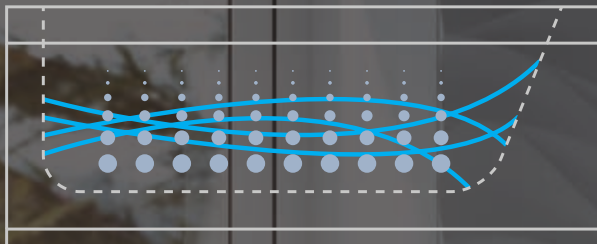

WHIRL

POOL

Salon® Spa

The ultimate hydromassage experience combines Whirlpool and Pure Air® features with exclusive Jacuzzi® jets and gentle air bubbles in one highly customizable bathtub.

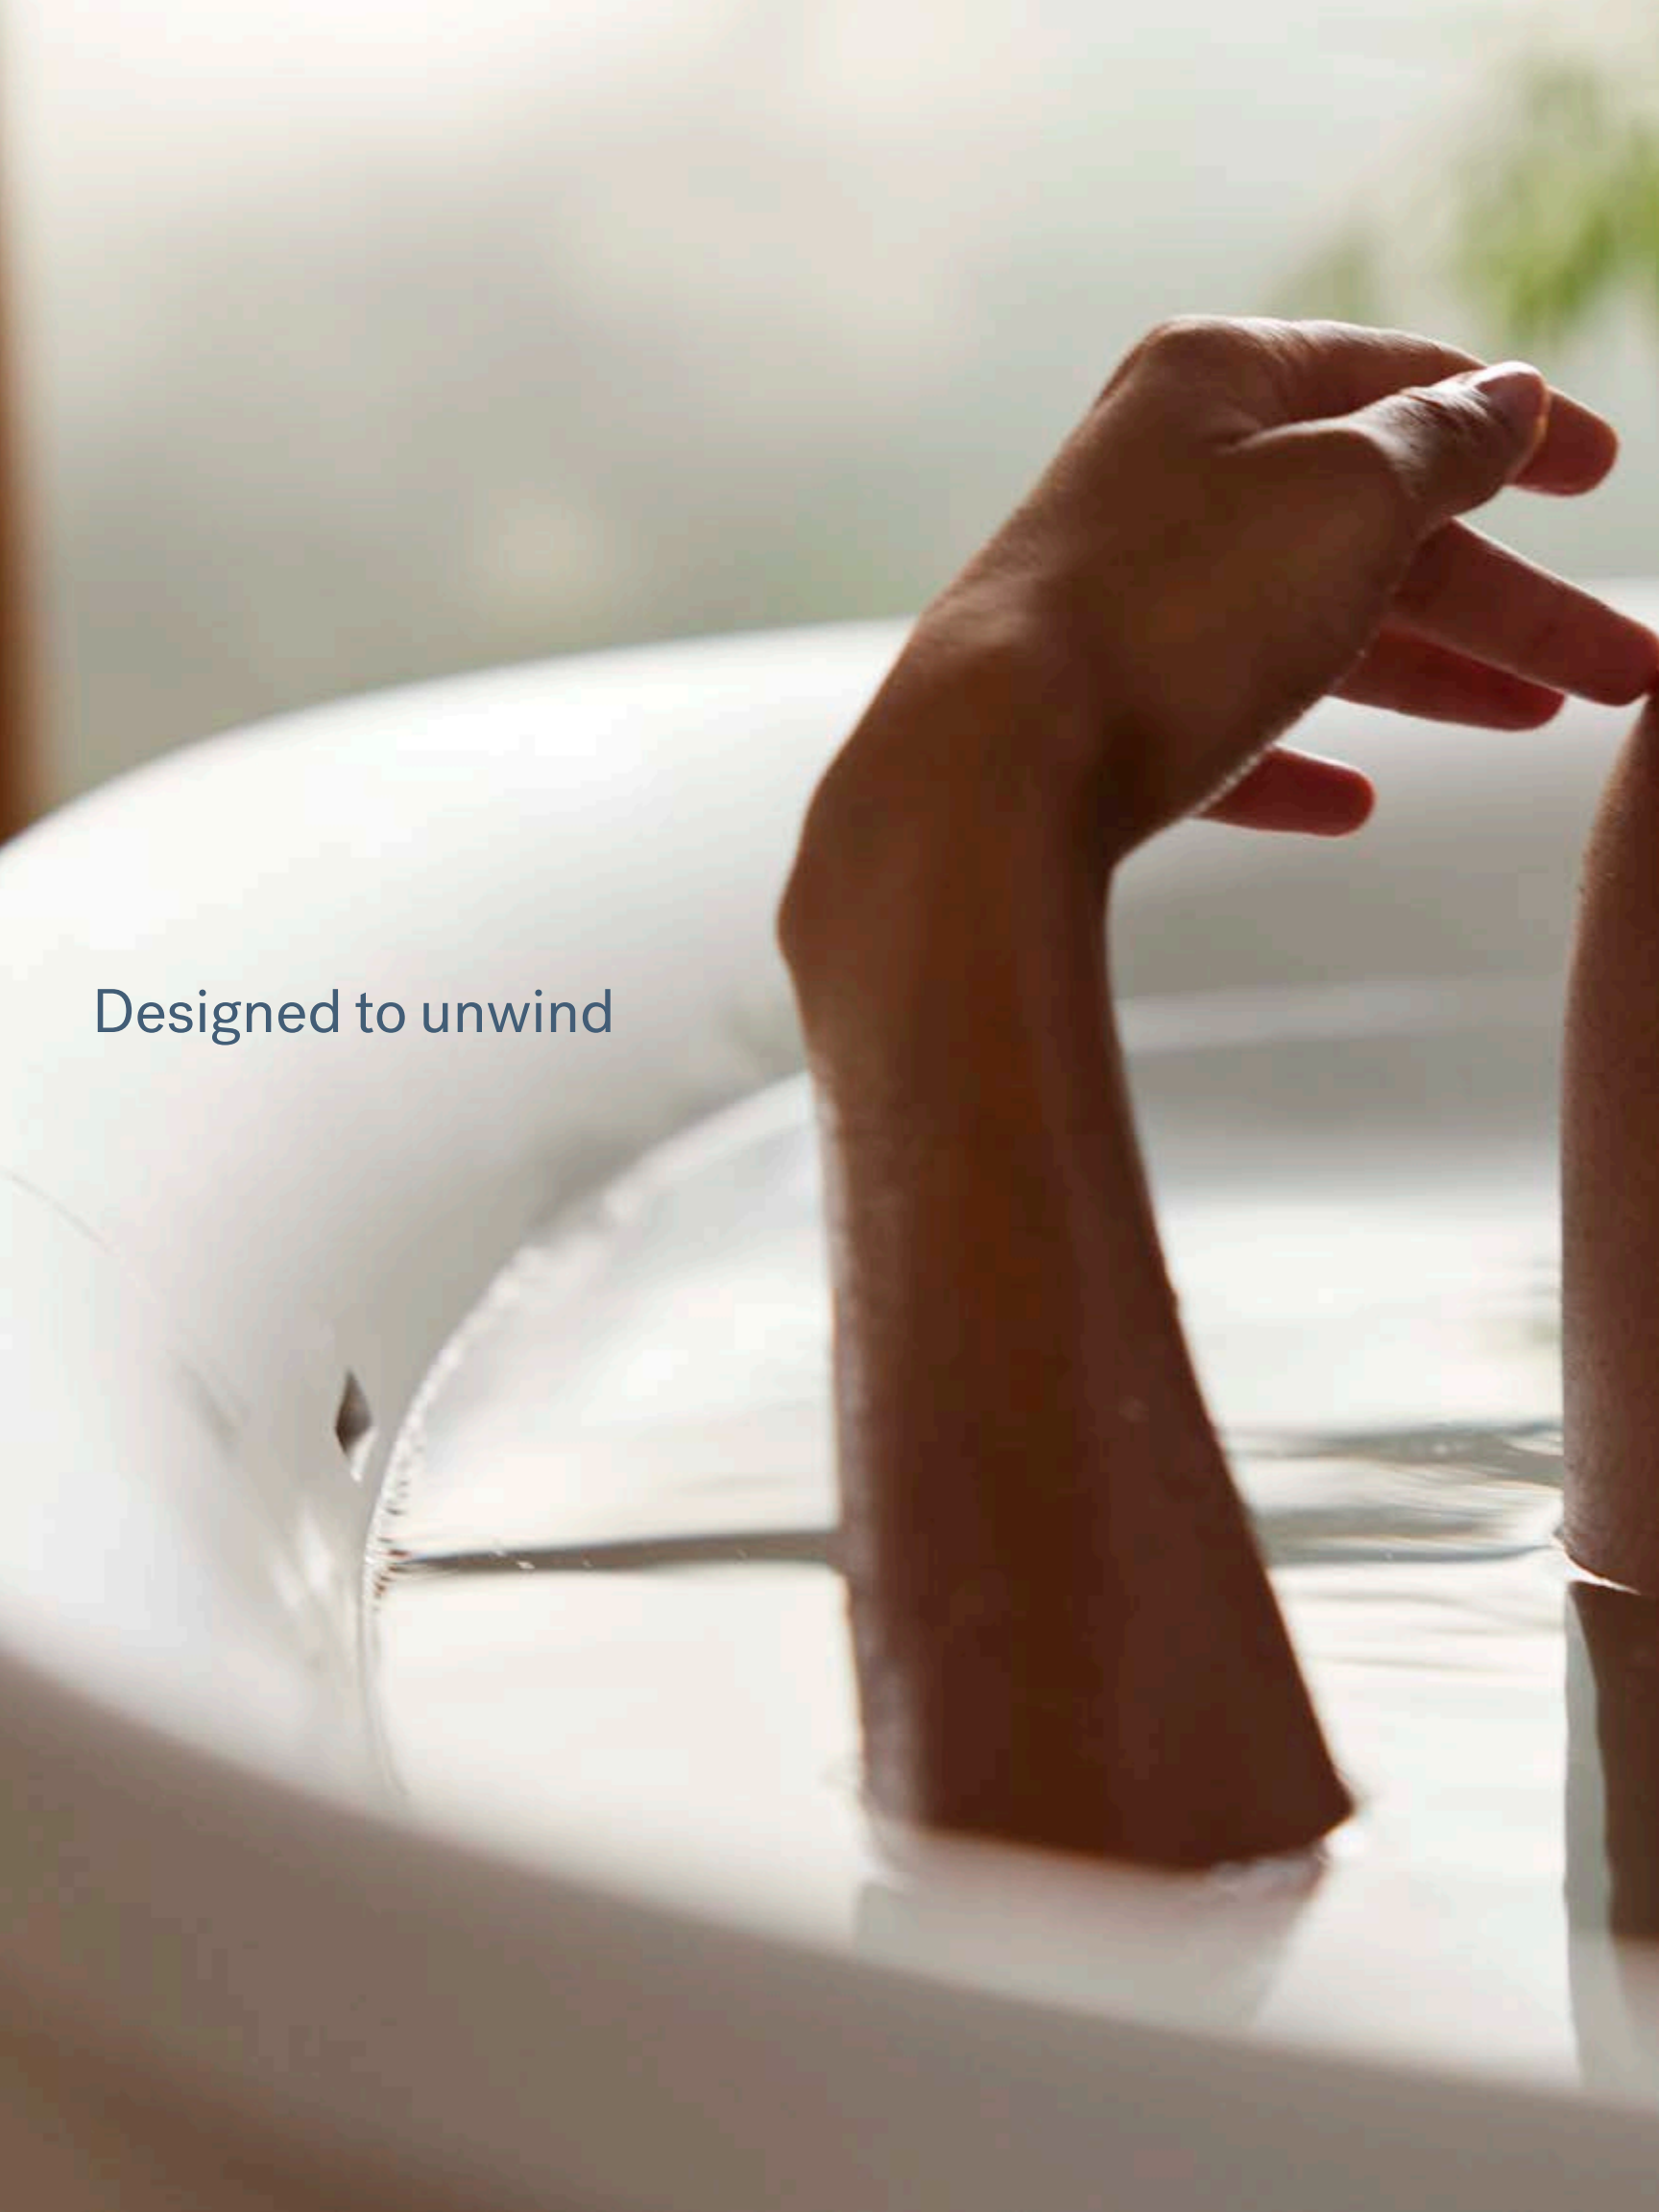

SS

SALON®

SPA

A close-up, low-angle shot of a person's arm and hand reaching out towards a white, curved object, likely a surfboard. The hand is positioned as if about to touch or grip the surface. The background is a soft-focus view of a body of water and distant greenery, suggesting a coastal or beach setting. The lighting is warm and natural, coming from the side, creating a serene and contemplative mood.

Designed to unwind

Clean¹ calms the senses

CleanLine[®] system, standard on all Jacuzzi[®] jetted baths, is engineered to provide a cleaner bathing experience.

CleanLine[®] technology

Anti-microbial² water lines are standard in all tubs, except Soaking Tubs.

Systems Clean[™] jetted bath cleaner

Quickly deep clean, sanitize, and deodorize Heated Soak, Whirlpool, Swirlpool[®], and Salon[®] Spa bathtubs.

Drain-down plumbing

Uses gravity to drain all the water out of the system, leaving no water sitting behind in the lines.

Auto-Dri™ feature

Preprogrammed to drive excess water from air lines in Salon® Spa and Pure Air® bathtubs.

Non-porous acrylic

Acrylic is naturally non-porous, which simplifies cleaning.

¹ Clean is defined as the inhibition of microbial growth. Our bathtubs are manufactured using non-porous acrylic materials and, coupled with our CleanLine® system that removes water from the vinyl tubing, helps to remove microorganisms that can cause bacterial growth.

² Our vinyl tubing is enhanced with 4,5-Dichloro-2-octyl-4-isothiazolin-3-one (DCOIT), a powerful additive developed by Dow Chemical Company. To ensure the highest quality and performance, we've partnered with Enthalpy Analytical, a trusted third-party lab, to test our tubing. The results confirm that our tubing effectively inhibits microbial growth (fungicide/fungistat to bactericide/bacteristat and algicide/algistat), delivering reliable, long-lasting protection. Product Safety Assessment documents are available under the product name EVOQUE™ and can be found at www.dow.com/productsafety/finder/

Get in touch with the perfect surface

Quality you can feel. Quality that lasts, bath after bath. Thermoformed sheets of solid acrylic are supported with a custom reinforcement formula—used on bathtubs and shower bases.

Easy to clean

An acrylic tub is easy to maintain thanks to its non-porous, stain-resistant surface. It makes cleaning with a nonabrasive cleanser simple—just wipe down the tub to help retain its luster, color, and showroom condition.

Maintains its look

Its non-porous material generally stands up to UV sunlight and won't stain if substance is quickly removed. If your bathtub should happen to scratch or dull, you can easily restore the appearance back to new.¹

Lightweight

Acrylic is the lightest tub material, weighing in at 60-70 pounds, so there's no need to reinforce the floor beneath the tub with supports or bracing.

Durable

Acrylic Jacuzzi® bathtubs are reinforced with a proprietary fiberglass/resin formula that ensures a long-lasting quality surface.

Retains heat

Acrylic feels warm to the touch and insulates well, so water doesn't cool as fast as enameled-steel or cast-iron tubs.

¹To clean the bathtub, use one of Meguiar's mild, nonabrasive liquid detergent solutions. You can protect and restore the luster to a dulled acrylic surface by applying Meguiar's #10 Mirror Glaze, a product specifically designed for use on acrylic finishes. Never use abrasive household cleaners of any kind on any Jacuzzi Luxury Bath product. Minor scratches which do not penetrate the color finish can be removed by lightly sanding with #600-grit wet and dry sandpaper. Restore the gloss using Meguiar's Mirror Glaze. Major scratches and gouges which penetrate the acrylic surface will require refinishing. Call Jacuzzi Luxury Bath at 1-844-602-6064 to find a service agent in your area.

Heavy duty, light touch

Aqualibrium® maintains an optimal mix of air and water, and with 360-degree air induction, the jets have the power to bring a deeper, more intense massage in a gentle way.

Feel at home with the jet set

Because everyone likes their massage a little different, patented, TargetPro™ jetting offers adjustable jet stream direction and intensity for a personalized massage experience.

TargetPro™ jet

This patented Jacuzzi® exclusive jet has 60° adjustability and is available with our Illumatherapy® feature.

SlimPro® and SlimPro® Mini-jets

Ultra-low profile jets for added comfort. Offered in multiple finishes.

AccuPro™ and TheraPro® jets

These jets have adjustable flow and direction to accurately target the back and feet.

PointPro® jet

Use air controls to choose a gentle or invigorating massage with adjustable flow and direction.

Easy from the word “go”

Peace of mind begins before you run your first bath. We've taken great care to design every bathtub to be as easy as possible to install.

Fits right in

Tru-Level® base comes standard on Jacuzzi® bathtubs¹ and shower bases. For bathtubs, Tru-Level® is precisely cut to keep the tub level without using mortar.

Power accessible

Most Jacuzzi® tubs only require 110 volts, standard in the vast majority of electrical outlets. Salon® Spa baths require 220 volts.

Built-in access

Some skirted tubs include a panel that provides easy access to the underside.

Drain-aligned

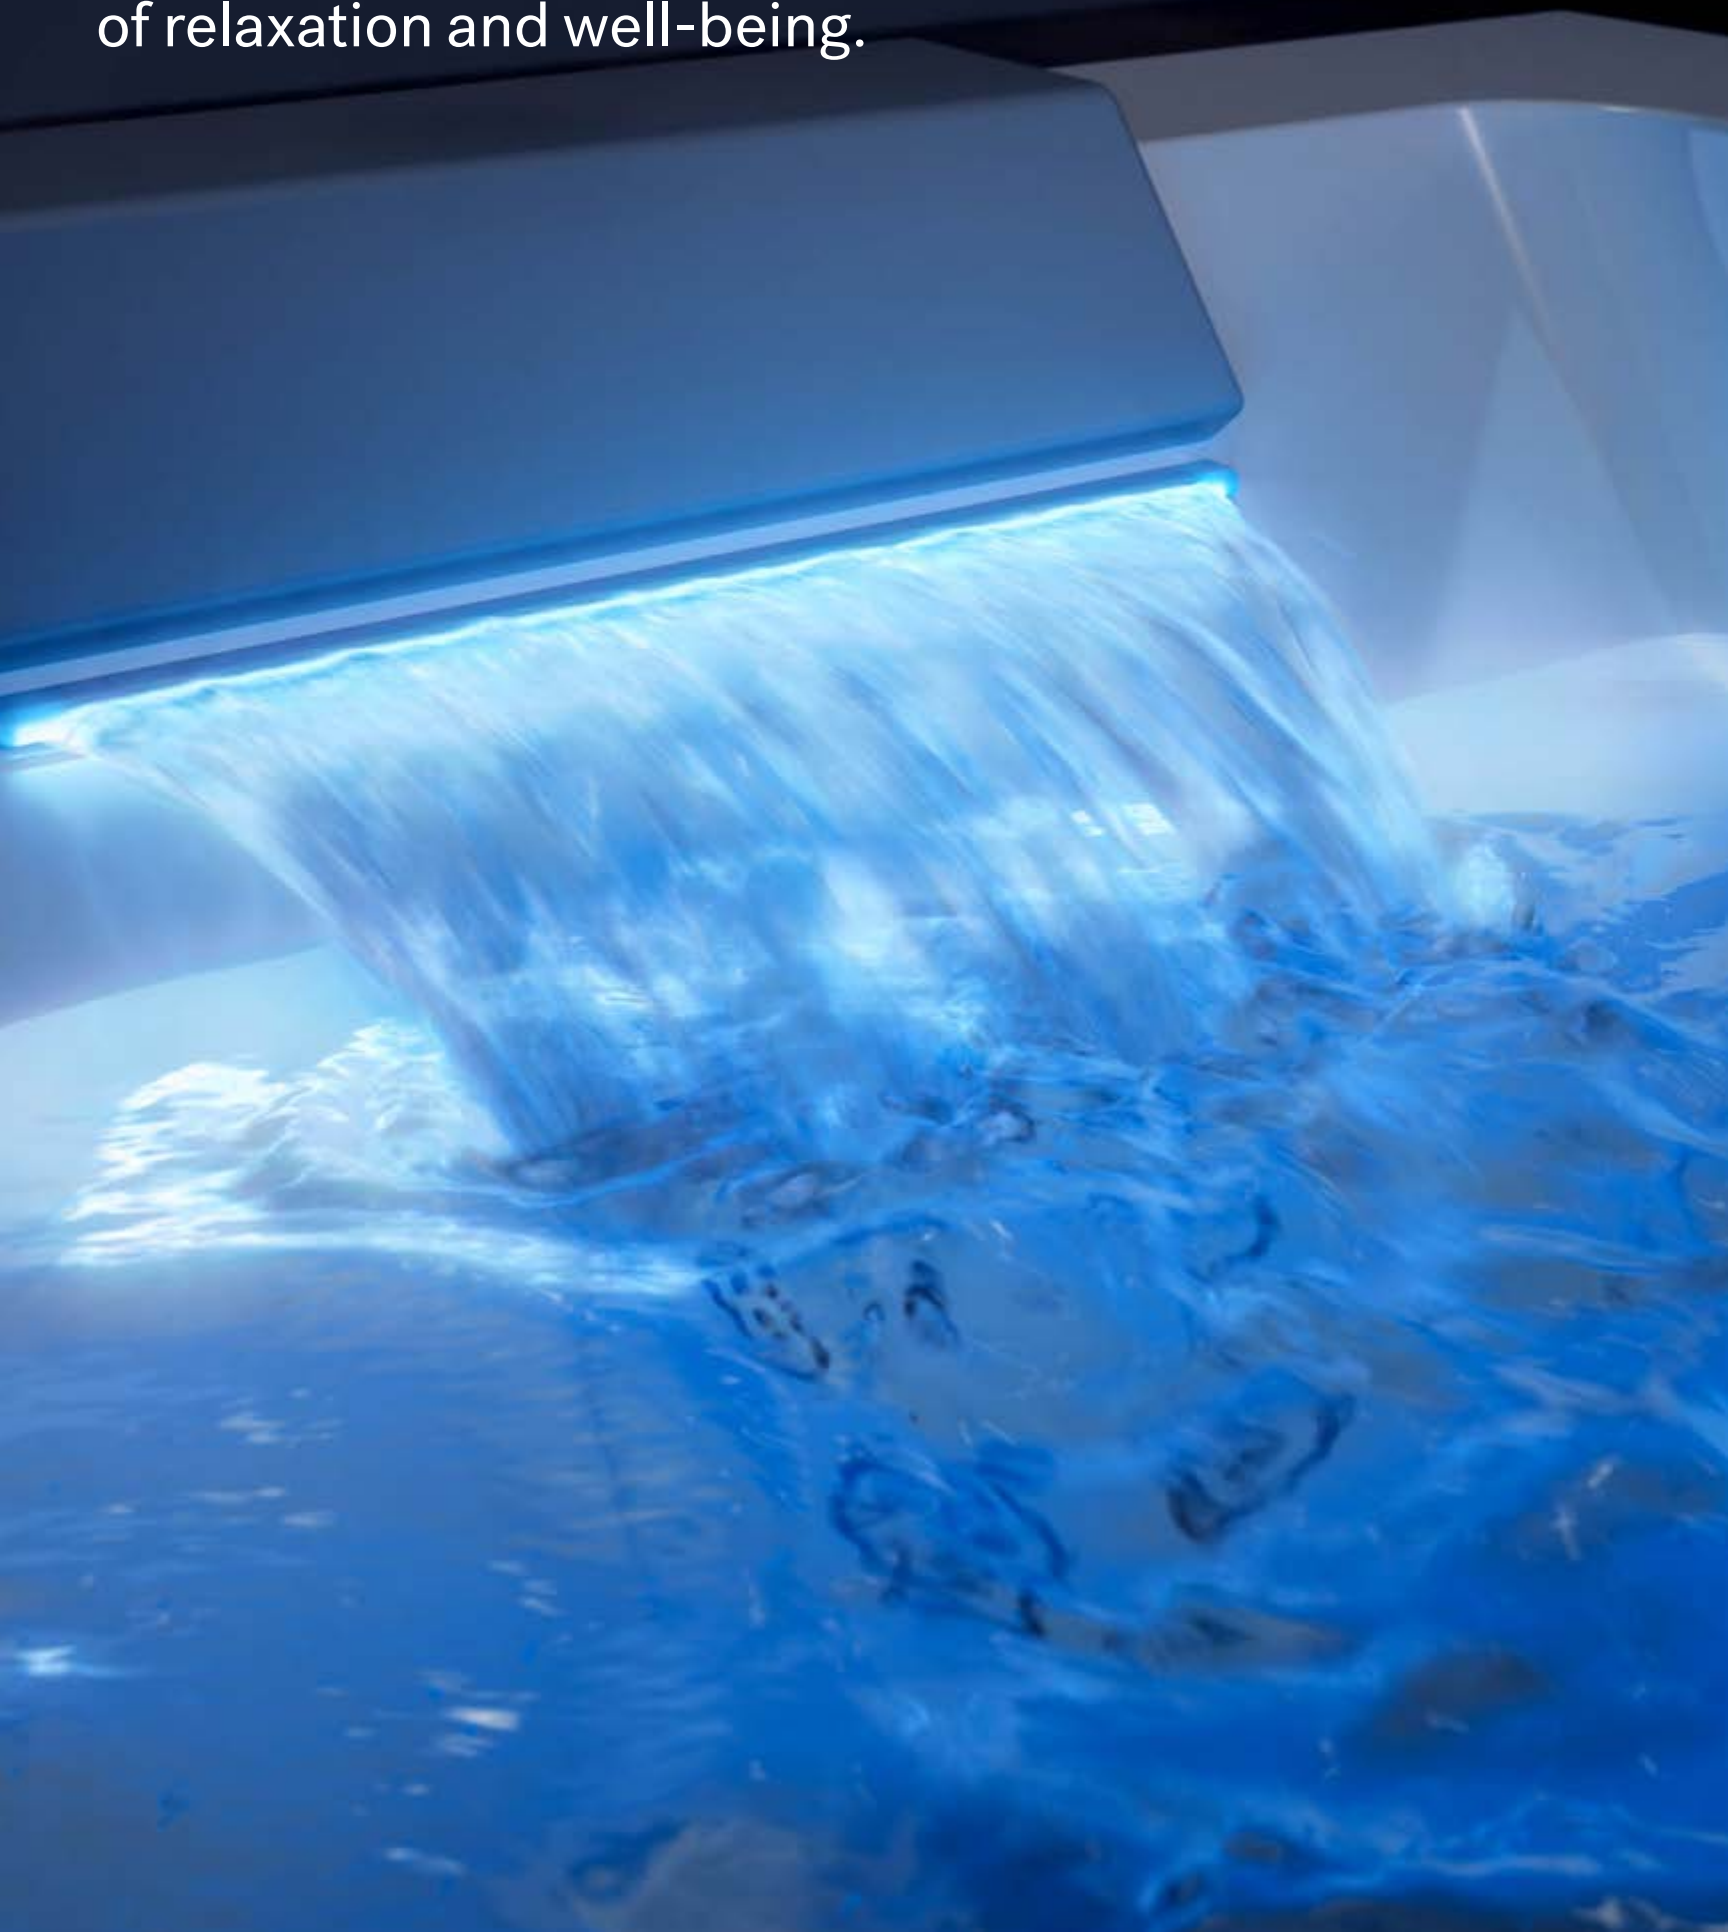

Freestanding tubs have a drain alignment kit available for purchase for easier installation.

¹ Select bathtubs have different leveling systems.

Upgrade the experience

Create the perfect ambience for your bath with specialized Jacuzzi® lighting options designed to transform your bathroom into a sanctuary of relaxation and well-being.

Lighting

Chromatherapy is the use of color and light to restore balance and well-being.

Chromatherapy

Jacuzzi® Chromatherapy features LED lighting through one or two wall-mounted lenses, echoing the colors in nature that come from light.

On select Fuzion® models and the Elara® Plus, Chromatherapy is available as a lighted neck-massaging waterfall.

Illumatherapy®

The exclusive technology of LED Illumatherapy® makes color and light sparkle throughout the bathing well from within four patented TargetPro™ jets.

Whisper+ Technology®

Our quietest jetted experience of all, a brushless motor mounted on the Whisper vibration-absorbing base reduces noise and vibration up to 66% while using 60% less energy and transferring heat back into the water.¹

Whisper Technology®

A vibration-absorbing mount allows you to enjoy the benefits of a jetted bath with less noise and vibration.

¹ Based on results at a third-party test facility. Elara® standard 120V Whirlpool bath with heater vs. Elara® Whisper+ Technology® 120V Whirlpool bath.

Free to be

Jacuzzi® Freestanding bathtubs are designed to be the centerpiece of your bathroom, and yet are extremely versatile in their placement. Without walls as a barrier, you have 360-degree freedom.

Model

Adatto™

Adatto, or suitable in Italian, has a double meaning when it comes to the Adatto™ bathtub. It not only accommodates a deck-mounted filler, but its design and finish are versatile enough to suit a variety of tastes.

Wellness starts with a world that is well.
Learn more about our sustainability commitments.

Feel yourself transformed

Immerse yourself
in the experience that made
us a household name

Feel a weight lift
at the mere thought of warm
pulsating water

Let stress wash away
as you step in
Emerge rejuvenated
to take on the day
And let the long-lasting
refreshing energy transform
your mind and body
